The individual under supervision has not complied with the following condition(s) of supervision:

Violation Number    Nature of Noncompliance

I                      The individual under supervision has violated the special supervision condition which states '**The defendant shall refrain from any unlawful use of a controlled substance. The defendant shall submit to one drug test within 15 days of release from custody and at least two periodic drug tests thereafter, not to exceed eight tests per month, as directed by the Probation Officer.'**

Mr. Reed tested positive for buprenorphine on April 9, 2025, as part of his weekly drug testing regimen at Oaks Integrated Care. The sample was flagged as a "substitute sample," due to abnormally low creatinine levels. Mr. Reed promptly admitted to his counselor at Oaks and the undersigned officer that he interfered with the sample, as he had used cannabidiol, or CBD, which is the primary compound found in marijuana. He noted that he is aware he "messed up," and would not do it again.

U.S. Probation Officer Action:

Mr. Reed started his term of supervised release on July 12, 2024, and transfer of jurisdiction was obtained from the Central District of California on September 30, 2024, with reassignment to Your Honor. Prior to his assignment of a Judge in the District of New Jersey, there were two positive drug tests for heroin and

methamphetamine on July 15, 2024, and July 25, 2024, both of which he admitted to using. Since that time, Mr. Reed has been enrolled in treatment with Oaks Integrated Care, and has been tested regularly, with noted success.

This recent positive is, per Mr. Reed, due to stress and anxiety that he stated he was feeling, along with associating with negative networks. He informed that he will be addressing this stress in his treatment sessions, and he has already stopped associating with the peers who are not conducive to his progress. The undersigned officer has spoken with Mr. Reed's treatment provider at Oaks Integrated Care, and his treatment sessions will be increased as a result of this positive result. At this juncture, it is respectfully requested that no action be taken, so as to allow Mr. Reed to return to treatment at a higher level, and benefit from increased therapy. The undersigned officer will continue to maintain contact with his counselor to address his ongoing treatment needs.

Respectfully submitted,

JOSEPH A. DAGROSSA, Chief  
 U.S. Probation Officer
